Leaders in Women’s Healthcare Since 1984

Cartersville Ob/Gyn Associates is a full-service ob/gyn practice, delivering women the exceptional care, medical expertise, compassion and support they deserve through every life cycle – from menstruation and childbirth to menopause and beyond.

We’ve been a leader in women’s healthcare since our 1984 founding. Over the past three decades, we’ve introduced to Cartersville and surrounding northwest Georgia region numerous advancements in our medical specialty that are now considered the gold standard of ob/gyn care. Among the many “firsts” we pioneered here are collaborative midwifery/physician care for obstetric patients, non-invasive sterilization, and minimally invasive surgical solutions for hysterectomy, incontinence, infertility and other common gynecological/pelvic conditions.

In addition, we are the first and only ob/gyn practice in Georgia with an onsite, fully accredited outpatient surgery center for performing all major and minor gynecological procedures. Opened in May 2010, our Georgia Advanced Surgery Center for Women specializes in laparoscopic and other highly advanced, minimally invasive surgical techniques that enable even the most comprehensive gynecological procedures – such as total hysterectomy – to be safely performed as true, same-day outpatient surgeries. The state-of-the-art facility is, in fact, among only a few facilities in the entire state to be awarded special Center of Excellence designation by the American Association of Gynecologic Laparoscopists (AAGL), the premier standards-setting organization for our surgical specialty.

Our full-service practice, state-of-the-art surgery center, and board-certified physicians and midwives offer you the very highest level of ob/gyn care available anywhere today.

- Pelvic pain
- Polyps

Our Minimally Invasive Surgical Solutions
Our award-winning Georgia Ob/Gyn is in the midst of its first and only surgical facility for performing all major and minor gynecological procedures in a true outpatient setting – and among only a few lack of it in the entire nation. This model of one-visit specialty care in laparoscopy and other highly advanced, minimally invasive techniques offers women costly hospitalization and simplify surgical incisions – while also providing them with the most cost-effective surgical care. Among the numerous procedures we offer are:

- Hysteroscopy – including hysteroscopic fatty tumor, endometrial polyp, and submucosal leiomyoma (SML)
- Hysterectomy alternative – including hysteroscopic polypectomy, endometrial ablation, and D&C

- Urogynecological services – including minimally invasive incontinence and urogynecological services.
- Sterilization procedures – including tubal and tubal ligation
- Ovarian cyst surgery
- Laparoscopic uterine suspension

Our Cosmetic Treatments & Procedures
We also provide women with the very latest cosmetic prescription treatments and procedures, of which none are more minimally invasive. These include:

- BOTOX 
- JUVELA 
- LATTICE 
- VIVACE
- Year and clinical (Bliss) SkinCare
- Tatcha ( rebuttable/bibliothec techniques)
- Procedures
- Non-surgical
- Fat transfer procedures

Our Expert Physicians
Hugo D. Ribot, Jr., M.D., F.A.C.O.G.
A Board Certified physician in the specialties of obstetrics, gynecology and advanced laparoscopic surgery, Dr. Ribot is the managing partner of Cartersville Ob/Gyn Associates and the founder/ medical director of its outpatient surgical facility, the Georgia Advanced Surgery Center for Women. A 1981 graduate of Dartmouth College, Dr. Ribot received his medical degree from the University of Miami School of Medicine in 1986. He completed his residency in obstetrics and gynecology at Emory University Affiliated Hospitals in 1990, receiving its first-ever annual "Best Laparoscopic Surgical Resident Award." Since joining Cartersville Ob/Gyn in 1990, he has introduced to the northwest Georgia region numerous advancements in the specialty.

Dr. Barfield is a Board Certified physician in the specialties of obstetrics and gynecology, and also performs advanced laparoscopic surgery. Dr. Barfield completed his ob/gyn residency at Emory University Affiliated Hospitals in 2004. He is a 2000 graduate of NSU Stritch School of Medicine in Cleveland, Ohio, and holds a Bachelor of Science degree in microbiology from Ashland University. Dr. Barfield also is a co-founder and staff physician of Cartersville Ob/Gyn’s outpatient surgical facility, the Georgia Advanced Surgery Center for Women.

Staci N. Kenner, M.D.
Dr. Staci Kenner joined Cartersville Ob/Gyn Associates in August 2012. She performed her ob/gyn residency at Methodist Dallas Medical Center, where she served as chief resident from 2011-2012, and received prestigious medical-industry awards for residents in the specialties of obstetrics, gynecology and minimally invasive gynecology. Dr. Kenner received her Medical Doctorate from Case Western Reserve University School of Medicine in Cleveland, Ohio, and holds a Bachelor of Arts in Psychology from Spelman College in Atlanta. A Junior Fellow of the American Congress of Obstetricians and Gynecologists (ACOG), she also is a member of the American Medical Association and the American Association of Gynecologic Laparoscopists.

Our mission is to provide women with the very latest, safest, least-invasive, and most-effective ob/gyn treatment and care available today, as well as to provide our patients with the best customer service possible.

"If a clinical nurse, I can honestly say that the entire staff of this practice – from the doctors and nurses to our nurses – provide patients with the very best obstetric and gynecology care available.”

Mary Lindsey, R.N., B.B.S.
Rome, Georgia

- Cesarean delivery
- Vaginal birth after Cesarean
- Cesarean

Our Gynecological Services

We provide complete routine and well-woman care, as well as the treatment of all major and minor gynecological conditions. All of our doctors and midwives are board-certified in obstetrics and gynecology, and our gynecologists complete advanced diagnostic services onsite, and can completely evaluate your specific condition in our office, versus a hospital operating room. Our diagnostic testing includes colposcopy, biopsies, pelvic ultrasound, hysteroscopy, urodynamic and cystometic evaluation, and laboratory testing. Our medical evaluation will determine whether non-surgical or surgical treatment is needed to effectively treat your condition. Should surgery be required, we also have our own onsite, state-of-the-art outpatient surgical facility, the Georgia Advanced Surgery Center for Women.

Our Minimal Invasively Surgical Solutions

Our award-winning Georgia Advanced Surgery Center for Women is the state’s first and only surgical facility for performing all major and minor gynecological procedures in a true outpatient setting – and among only a few facilities in the entire nation. This state-of-the-art facility specializes in laparoscopic and other highly advanced, minimally invasive techniques that open your body, hospitalize and completely treat surgical incisions – while also providing them with the most, least painful recovery possible. Among the numerous procedures we offer are:

- Hysterectomy – including laparoscopic hysterectomy (LH), total vaginal hysterectomy (TVH) and laparoscopic supracervical hysterectomy (LSH)
- Hysterectomy alternatives – including laparoscopic polypectomy, endometrial ablation, and Mirena®
- Sacrocolpopexy – including minimally invasive vaginal sagittal and Intersutures®
- Pelvic organ prolapse repair – including pelvic floor reconstruction
- Pelvic prolapse surgery – including total, partial, and abdominal incision
- Postmenopausal pain
- Laparoscopic anterior incontinence

Our Cosmetic Treatments & Procedures

We also provide women with the very latest cosmetic prescription treatments and procedures, most of which are non- or minimally invasive. These include:

- BOTOX® Cosmetic
- JUVÉDERM® XC
- Latisse®
- Year and clinical (blue) Light® Photorejuvenation
- Timney tech (Cold/hot/hyper techniques)
- Microneedling
- Vascular reflux
- Permanent make-up
- Pelvic organ prolapse
- Parietal pain
- Polyneuropathy

In a clinical trial, I can honestly say that the entire staff of this practice – from the doctors and midwives on down – provide patients with the very best obstetric and gynecological care available.”
